

RE: ROSTRA ACCESSORIES INC. AND FMVSS 111 CAMERA COMPATIBILITY / COMPLIANCE

3/1/2018:

Rostra Accessories Inc. offers select RearSight and Sentry Pro-Grade camera solutions to aid in achieving compliance with FMVSS 111.

Select cameras supplied by Rostra Accessories Inc.; when installed as designed, per the included instructions, at a proper angle, and without any modification, will provide a viewing angle that meets or exceeds the requirements for FMVSS 111 standards.

Installation, angle, and final viewing angle are all determined by the installer/vehicle manufacturer/up-fitter and should be confirmed at installation to ensure that FMVSS 111 viewing angle requirements are met.

Rostra Accessories RearSight and Sentry Pro-Grade cameras also has been tested to exceed US-DOT test procedure minimum requirements as listed in TP-111V-01 required by FMVSS 111 for Corrosion, Humidity, and Temperature exposure. Testing standards available upon request.

However, it is the sole responsibility of the installer/vehicle manufacturer/up-fitter to determine if the camera viewing angle when installed meets FMVSS 111 and/or any other applicable vehicle certification. Any information made available by Rostra regarding its camera kit is not intended to be, and shall not be, relied upon as a final determination of compliance with FMVSS 111 and/or any other vehicle certification. Each up-fitter/final-stage manufacturer must, on its own, make each such required determination for each vehicle it offers. Final compliance should be documented (with photos) showing that the camera when installed provides the correct viewing angle to meet FMVSS-111 standards.

Product details and sample compliance images are available at www.rostra.com.
